PROFILE

Motivated And Quick-Learning Software Developer With Knowledge Of Java, Python, SQL, And Web Technologies. Hands-On Experience Building An AI-Powered Ticket Resolution System Using Python, Flask, LLMs, And RAG-Based Architecture. Skilled In Developing End-To-End Applications, From Frontend Design To Backend Development And Database Integration. Passionate About Solving Real-World Problems And Contributing To Innovative Software Development Projects.

CORE SKILLS

Programming Languages - Java, Python, SQL

Web Technologies - HTML, CSS, JavaScript

Backend Development - Python Flask, Object-Oriented Programming (OOP)

Database - SQL, Database Design, Query Writing, Data Retrieval

Artificial Intelligence - Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering

INTERNSHIP

Auto Suggestions For Helpdesk Tickets | Suguna Groups

Feb 2026 – May 2026

- Developed An AI-Powered Helpdesk Ticket Resolution System Using Large Language Models (LLMs) To Generate Intelligent Ticket Suggestions And Recommended Solutions.
- Designed And Implemented Automated Ticket Classification And Prioritization Workflows Using Natural Language Processing (NLP) Techniques To Improve Support Efficiency.
- Integrated LLMs Through Ollama And Leveraged Retrieval-Augmented Generation (RAG) To Retrieve Relevant Historical Resolutions And Provide Context-Aware Responses.
- Built End-To-End Functionality Using Python, Flask, SQL, HTML, CSS, And JavaScript, Reducing Manual Effort And Enhancing Ticket Resolution Accuracy.

CERTIFICATION

- Microsoft Azure Fundamentals
- Python Programming
- Database Management Systems (DBMS)
- Cyber Security Fundamentals
- Web Development

PROJECTS

Result Analysis And Management System | Mini Project

June 2024

- Developed A Web-Based Result Management System To Manage Student Records, Subject Information, Class Details, And Academic Results Efficiently.
- Designed Features For Result Processing, Performance Tracking, And College-Wide Notifications To Streamline Academic Administration.
- Implemented Role-Based Access For Students, Faculty Members, And Administrators To Ensure Secure And User-Friendly System Access.

Context-Aware Human Character & Mindset Analysis Using Facial Reaction | Main Project

April 2026

- Developed An AI-Powered System To Analyze Human Emotions, Behavioral Patterns, And Mindset Using Facial Expression Recognition And Computer Vision Techniques.
- Leveraged Machine Learning And Image Processing Algorithms To Detect And Interpret Facial Reactions In Real Time.
- Implemented Context-Aware Analysis To Improve Prediction Accuracy And Generate Meaningful Insights Based On User Expressions And Environmental Context.
- Explored Applications In Security Monitoring, Human-Computer Interaction, And Intelligent Decision Support Systems.

EDUCATION

B.Tech - IT (CGPA - 7.58)

November 2022 – April 2026

K.Ramakrishnan college of Engineering

HSC - 84%

May 2022

Gandhi Matriculation Higher Secondary School

SSLC - 74%

May 2020

Gandhi Matriculation Higher Secondary School
